1. I authorize the condition specific standing order protocol (full protocol available upon request), valid from January 1, 2022 - December 31, 2022, for Christina Falvey, RN to administer:

1. topical and or injectable anesthetics to patients prior to cosmetic procedures such as dermal fillers, neurotoxin administration, PDO thread lifts, or microneedling;
2. botulinum toxin A to patients with symptomatic fine lines and wrinkles in the face or symptomatic hyperhidrosis which has already been evaluated by a primary care doctor and has failed more conservative measures;
3. injectable dermal fillers to patients with symptomatic facial lines and moderate to severe facial wrinkles and folds, and/or correction of the signs of facial fat loss and/or lip augmentation.

Daniel Falvey, MD
7726 Peony Ln N, Maple Grove, MN 55311
